1. System Title

Online Materials Management and POS for MJC Hardware Trading

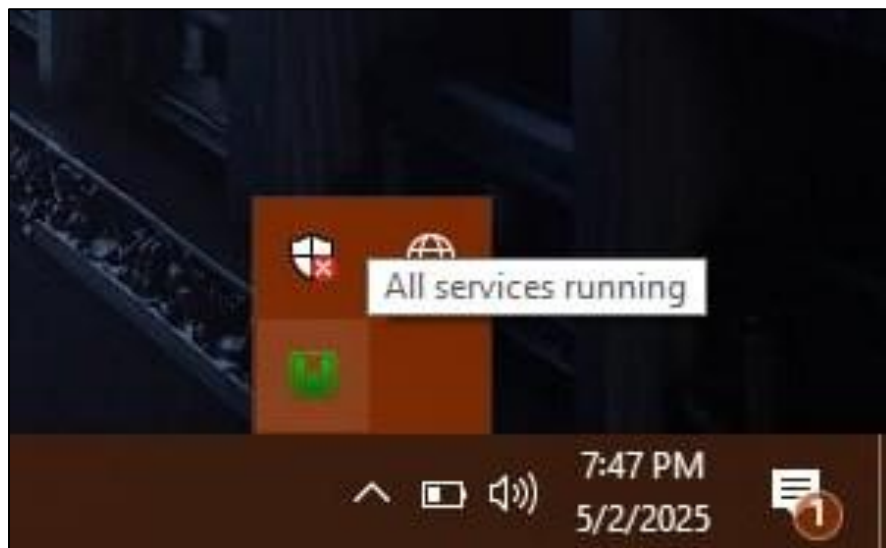

2. System Requirements

- Operating System: Windows 10 or higher
- Software Requirements:
 - WAMP Server (Apache + MySQL + PHP)
 - SQLyog Community Edition (for managing MySQL databases)
 - Any modern web browser (e.g., Google Chrome, Mozilla Firefox, Brave)
- Server Requirements:
 - PHP 8.2 or higher
 - MySQL 8.0
- Hardware Requirements:
 - Minimum 4GB RAM
 - Minimum 500MB free storage

3. Installation Instructions

3.1 Install WAMP Server

- Download WAMP Server from <https://www.wampserver.com/en/>.
- Install and run WAMP Server.
- Make sure the WAMP icon turns green (indicating all services are running).

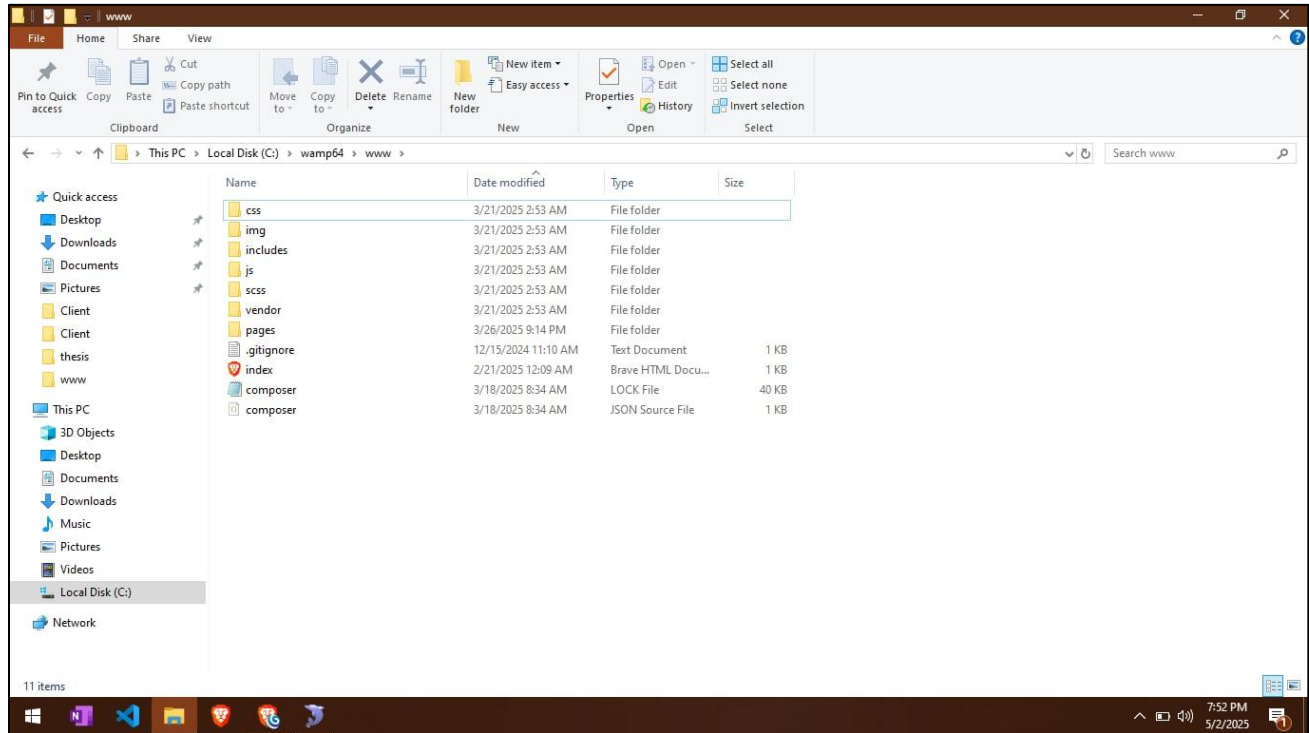

WAMP Server icon in taskbar

3.2 Install SQLyog (Optional)

- Download SQLyog Community Edition from <https://github.com/webyog/sqlyog-community/wiki/Downloads>.
- Install SQLyog and connect to your local MySQL server (localhost).

3.3 Copy the System Files

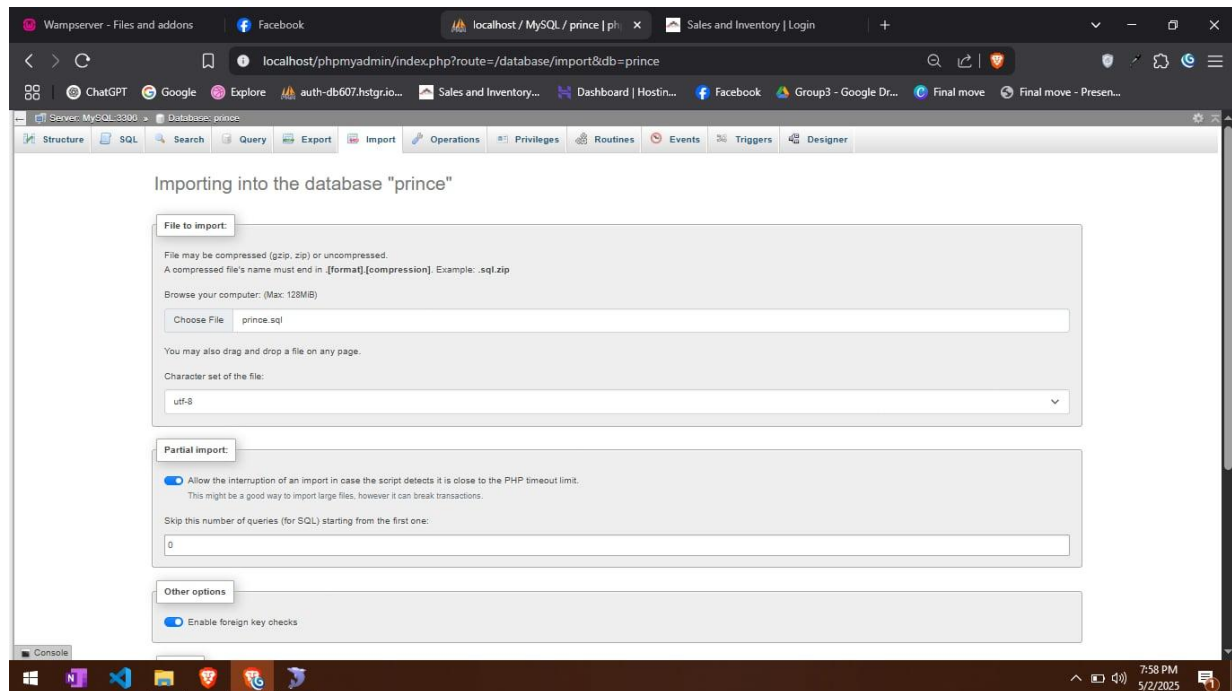

- Copy the entire System folder to: C:\wamp64\www\

System folder in www directory

3.4 Import the Database

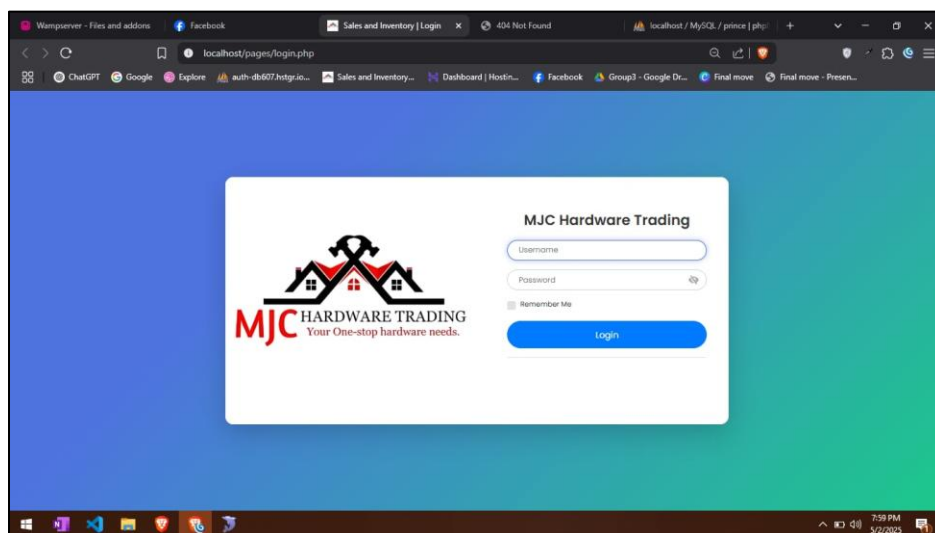

1. Open your browser and go to <http://localhost/phpmyadmin/>
2. Click New, create a database named prince
3. Click Import and upload the file prince.sql

phpMyAdmin - Database Import Screen

4. Running the System

- Open your browser and visit: <http://localhost/>

System Login Page

5. Default Accounts

Role	Username	Password
Admin	Admin	Admin
Branch manager	Manager1	Admin
Branch manager	Manager2	Admin
Cashier	Cashier1	Admin
Cashier	Cashier2	Admin

6. Notes

- Always ensure all WAMP services (Apache, MySQL) are running.
- SQLyog can be used as an alternative to phpMyAdmin for managing the database.
- Use any modern web browser (e.g., Google Chrome, Mozilla Firefox, Microsoft Edge) for best performance.
